3. PROFESSIONAL PROFILE

Software Engineering student focused on clean architectures and high-quality development. I have solid knowledge of programming logic, databases, and Artificial Intelligence integration to optimize technological solutions. I stand out for being proactive and creative, and for always staying at the forefront of technology, applying best development practices to deliver real value in every project.

4. DEVELOPMENT TOOLS (SOFTWARE)

Tech Stack & Technical Skills

Backend

Backend development with Python and Django, plus a TypeScript stack using Node.js, Express.js, and NestJS. Experience with BaaS (Backend as a Service) to accelerate application delivery.

Frontend

JavaScript and React as a foundation, with current proficiency in Next.js and TypeScript for modern, optimized web applications.

DevOps & Tools

Version control with Git and GitHub, continuous integration and deployment (CI/CD) with GitHub Actions, and application containerization with Docker.

CMS & Platforms

Experience in developing and managing WordPress sites.

Artificial Intelligence & Productivity

Use of AI tools for development: Claude Code, GitHub Copilot, Codex, Gemini CLI, Qwen CLI and local models using Ollama. AI-powered IDEs: Kiro and Antigravity, following best practices and Spec-Driven Development (SDD). Integration of AI workflows to accelerate development cycles, code review, and the generation of modern, robust solutions.

Best Practices & Architecture

Application of SOLID principles, Clean Code and design patterns (MVC, Repository, Factory, among others). Design of scalable and maintainable software architectures, with a focus on modularity, separation of concerns, and code quality.

Soft Skills

Teamwork and effective communication; time management and organization in agile environments; self-directed learning; and rapid adaptation to new technologies.
